

Dear FCC

In regards to GN Docket No. 13-86

Please do not change the standards for the television and other media content to allow nudity and more profanity on public communications. Public media influences many lives for good or ill. Nudity and vulgarity do nothing to add to society and will influence many people in harmful ways. Consider the children especially! They have no advocate who can speak for them, but countless research articles point out the fact that nudity and vulgarity can influence them in harmful ways leading to inappropriate actions and future likelihood of crime, rape and inability to communicate. Please do not change the standards, but consider reducing the amount of sexual content and vulgarity allowed on television.

Sincerely,

Dallin Hubbard
